Software Engineer

Professional Skills

- Proficient in identifying improvements and implementing code changes collaboratively with staff and clients.
- Expert in translating business requirements into desktop, web, and mobile-friendly applications.
- Experienced in integrating third-party data from various Web APIs and data sources.
- Solid understanding of relational databases and the ability to query and modify data.
- Knowledgeable in Interfaces, Object-Oriented Design, and MVC.
- Excellent written and verbal communication skills, delivering information, documentation, and objectives promptly.
- Proficient in developing, debugging, and maintaining software across diverse languages, encompassing PHP, C#, Python, JavaScript, SQL, MySQL, React, jQuery, AJAX, JSON, XML, HTML, CSS, and Bootstrap.

Work Experience

The Cardone Group
Software Developer   03/2018 – Present

- Utilized technical support and junior development experience to lead end-to-end software development.
- Maintained and created code for both online and locally installed applications, utilizing a diverse tech stack.
- Collaborated with cross-functional teams to design, develop, and implement innovative features, ensuring seamless integration across the software stack.
- Resolved complex technical issues, optimized performance, and enhanced the overall user experience.
- Played a key role in the adoption of modern web development frameworks and applied best practices in responsive design.
- Conducted code reviews and provided mentorship to junior developers.

Junior Software Developer   02/2014-03/2018

- Transitioned from technical support to active participation in the development and maintenance of full-stack code for web-based and desktop applications.
- Gained proficiency in a diverse tech stack, including PHP, C#, Python, JavaScript, SQL, MySQL, React, jQuery, AJAX, JSON, XML, HTML, CSS, and Bootstrap.
- Collaborated with senior developers to implement new features, optimize existing code, and ensure seamless integration across the entire software stack.
- Participated in code reviews, incorporating feedback and learning best practices to enhance coding skills.
- Contributed to the adoption of modern development tools and methodologies, such as version control systems and agile practices.
- Demonstrated a commitment to learning and professional development, staying updated on industry trends.
- Actively participated in team meetings, contributing ideas and updates to support project milestones.

Application Support Specialist   07/2007-02/2014

- Provided Tier 1 and Tier 2 technical support for web-based and desktop applications, offering assistance to end-users via phone, email, and remote support channels.
- Collaborated closely with development teams, escalating complex issues and contributing to the resolution process.
- Conducted software training sessions for end-users and trainers, improving overall product understanding.
- Documented support tickets and solutions, building a comprehensive knowledge base.
- Participated in on-call rotations to address urgent technical issues outside of regular business hours.

Education
Valencia Community College   **06/2011**
- *Associates in General Education*
